

USB-C Hub 4

USB-C | HDMI | Ethernet | USB 3.0

Most ultra-slim laptops and smart devices only have room for a single USB-C port, which means trade-offs between the charging cable and your other accessories. The Hub 4 instantly expands that single port from 1 to 4, so you get a USB 3.0, HDMI, Ethernet, and USB-C port. Keep your USB-C device fully powered while staying connected to an Ethernet router, HDMI display, and a standard USB accessory at the same time! Enjoy Pass Through charging, Super Speed data transfer up to 5 Gbps, USB-C Power Delivery up to 60 watts, Incredible Gigabit network speeds, and Plug & Play convenience. More Ports. More Options. More Power.

Features:

- Made for USB-C Devices
