

USB-C Hub 5

USB-C | 2x USB 3.0 | Micro SD | SD/MMC

Most ultra-slim laptops and smart devices only have room for a single USB-C port, which means trade-offs between the charging cable and your other accessories. The Hub 5 takes that single USB-C port and adds two USB 3.0 ports and two memory card slots, for an instant 1 to 5 port expansion! Connect 2 standard USB devices and a Micro SD or SD/MMC card to your host USB-C device, while keeping it fully powered! Enjoy Pass Through charging, Super Speed data transfer up to 5 Gbps, USB-C Power Delivery up to 60 watts and Plug & Play convenience. More Ports. More Options. More Power.
