

Universal Magnetic MagBuddy® Anywhere+

MagBuddy Anywhere + Magnetic Mount Mobile devices have become an indispensable tool. We rely on them to keep track of our calendar, stay on top of our social media feeds, and look up information quickly. Naztech's MagBuddy Anywhere + Universal Magnetic Mount is a new cradle-less mounting system designed to secure your devices with an attractive "floating" look. While most mounts only work on a flat surface, but the new Anywhere + has an adhesive base that is designed with dual flexible flaps so it can contour to a wider array of surfaces including your curved dashboard or car door! 360° Swivel Ball Technology lets you quickly adjust and rotate your device to any viewing angle. The entire system installs effortlessly to keep your hands free and your apps, updates, photos, messages, emails, and videos at a convenient and glance-able level. You'll be surprised where you'll find uses for it throughout your vehicle, office, and home.

Features:

- Universal compatibility
- Cradle-free design
- Residue-free adhesive metal plate
- Powerful neodymium magnets
- Hands-free phone calls and GPS use
- Multiple secure viewing angles
