

# CameraBag

## Backpack Insert

Camera gear is often expensive, so adequate protection is key on the go. This modular backpack insert was designed for the Naztech SmartPack but can also work double-duty as a standalone, shoot-from-the-hip bag thanks to an IPX4 water-resistant nylon exterior and removable shoulder strap. The adjustable padded dividers, elastic straps, and mesh zippered pouch keep you organized, while the blue lining helps enhance visibility of the contents in low-light conditions. Gear up for adventure!
